About Me

Experienced Full-Stack Web Developer with a strong background in both front-end and back-end development. I have a proven track record of delivering successful web projects and applications, managing the full lifecycle from initial planning to deployment and maintenance. I am proficient in a wide range of technologies including HTML5, CSS3, Bootstrap, JavaScript, Angular, C#, ASP.NET Core MVC, API development, and MySQL. My passion lies in creating efficient, scalable, and high-performance solutions, and I always strive to stay updated with the latest advancements in web development.

Experience

- **Tahaluf Al Emarat Technical Solutions | Full Stack Web Developer - Full Time**
  [Mar 2023 - Present]
  - Developed and maintained full-stack web applications using HTML, CSS, Bootstrap, JavaScript, Angular, TypeScript, C#, and asp.net core API.
  - Implemented responsive design using Bootstrap.
  - Built and integrated RESTful APIs with the front end.
  - Troubleshot and resolved technical issues related to the application stack, including performance optimization, debugging, and code optimization.
  - Developed and executed automated unit tests.
  - Designed and implemented the project structure and file architecture for Angular applications, including modules, components, services, and guards.
  - Participated in many projects such as [Red Sea Global - Project], [Learning Management System (LMS) - Product], [Student Information System (SIS) - Product], [Talent-Hub - Product]
  - with a focus on database management, front-end, and back-end development.

Web Projects

- **ABH News | Associated with Tahaluf | Asp.net, Angular**
  A secure news platform connecting journalists with users, featuring categorized news, user interaction via likes and comments, favorite categories, user authentication, and dynamic content management.
- **Herfa | Associated with Tahaluf | MVC**
  A platform connecting craft owners with customers, ensuring rights and providing a secure marketplace.
- **Blood Bank System| | Graduation Project | PHP**
  A web-based platform for managing blood donors and inventory, allowing donors to schedule appointments and hospitals to request blood units.
- **Tourist-Places| Personal Project | PHP**
  A website showcasing tourist destinations in Jordan, focused on usability and visual appeal.
